Having had a painting stolen from him, Artyom takes on a dangerous mission to get it back - and faces his greatest fears. Recommended System Requirements OS: Windows 7, Vista, XP and 2000 CPU: 2.5 GHz Memory: 2 GB RAM DirectX: Version 9.0 Graphics: NVIDIA GeForce 7800 GS or ATI HD 4870 Network: Broadband Internet connection Sound Card: DirectX compatible sound card Additional Notes: It is recommended that the game be played using the high settings of the game's graphics options.Q: Python2.7 getting the data into a tuple or list from a file I am using Python 2.7 and trying to write a function which is taking the data from a file and then storing it as a tuple or list. The input file is formatted as follows: `**line 1**  
**line 2**  
**line 3**  
**line 4**  
**line 5**  
**line 6**  
**line 7**  
**line 8**  
**line 9**` This is my code: `def write_to_file(): f = open(inputFile) lines = f.readlines() #create a tuple or list data_list = [] data_tuple = [] data_dict = {} for line in lines: data_list.append(line) data_tuple.append(data_list) data_dict.update({line:data_list}) f.close() #output file is a dict fileDict = open(outputFile, "w") fileDict.write("{fileContents': data_dict} ") fileDict.close()` In other cases this might be formatted as: line 1 line 2 line 3 line 4 line 5 line 6 line 7 line 8 line 9 Instead of having a long list of variables
