The Japanese independent game developer, The Game, developed the scenario-based adventure title, THE FINEST SCENERY, in 2016. The story and characters of THE FINEST SCENERY play off of Tokyo's urban, automobile culture of the 21st century. In an alternate reality, human resources are completely dominated by the FIA, a global automotive industry conglomerate. When a student fails to meet FIA quotas, he is temporarily suspended from society. The story follows the student as he changes his identity and looks for new opportunities.
